A modern & eclectic

cozy master bedroom

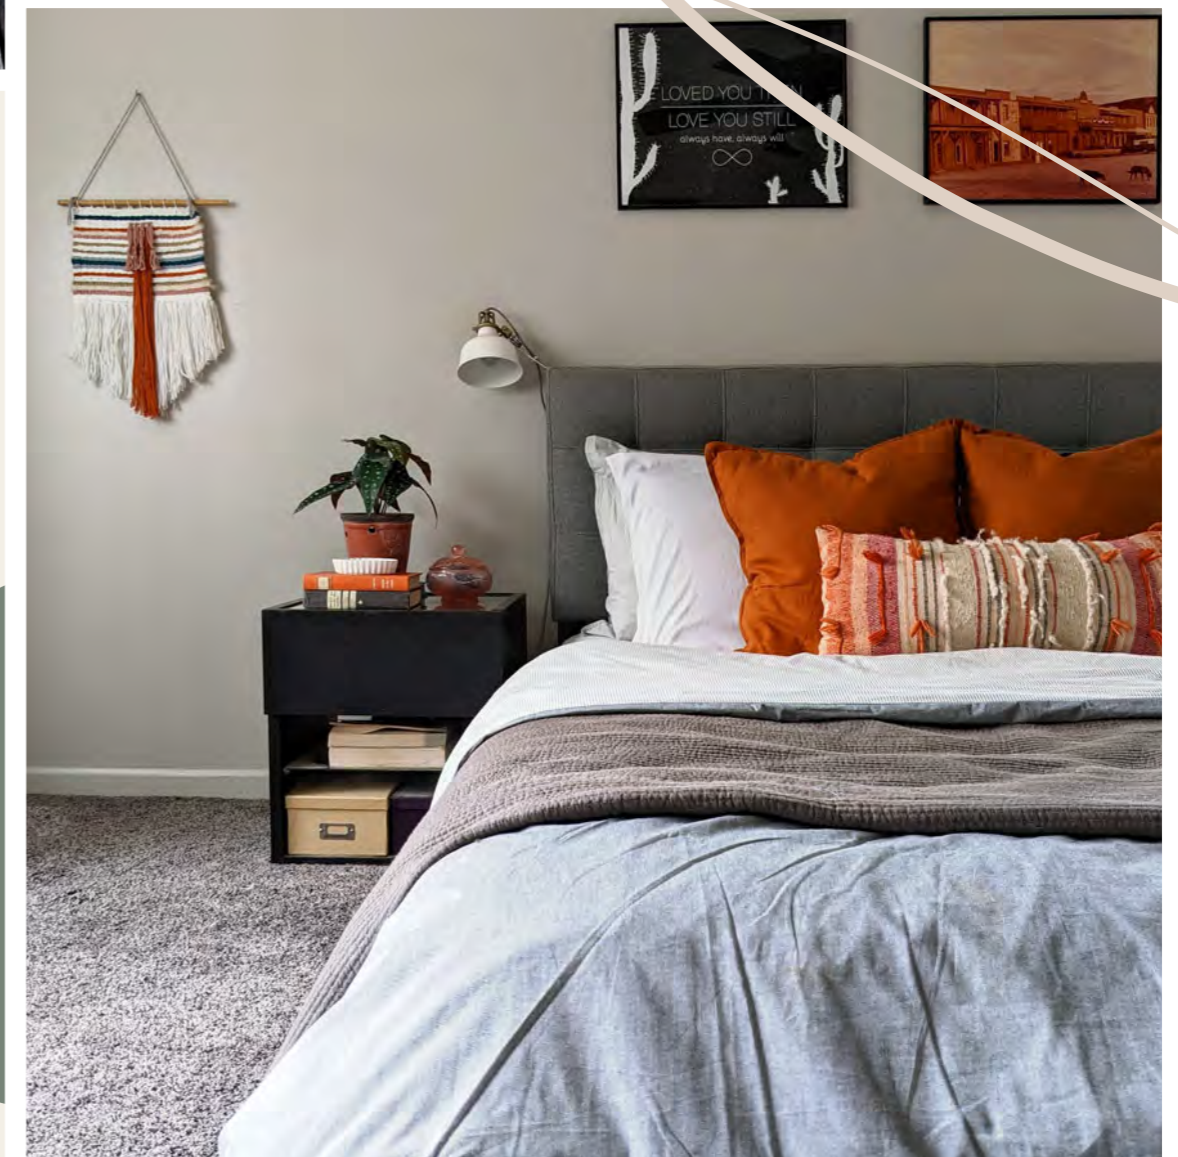

I am thrilled with the outcome of this room and am proud to showcase it in my design portfolio. I hope it serves as inspiration for others who are looking to create a restful and beautiful bedroom space.

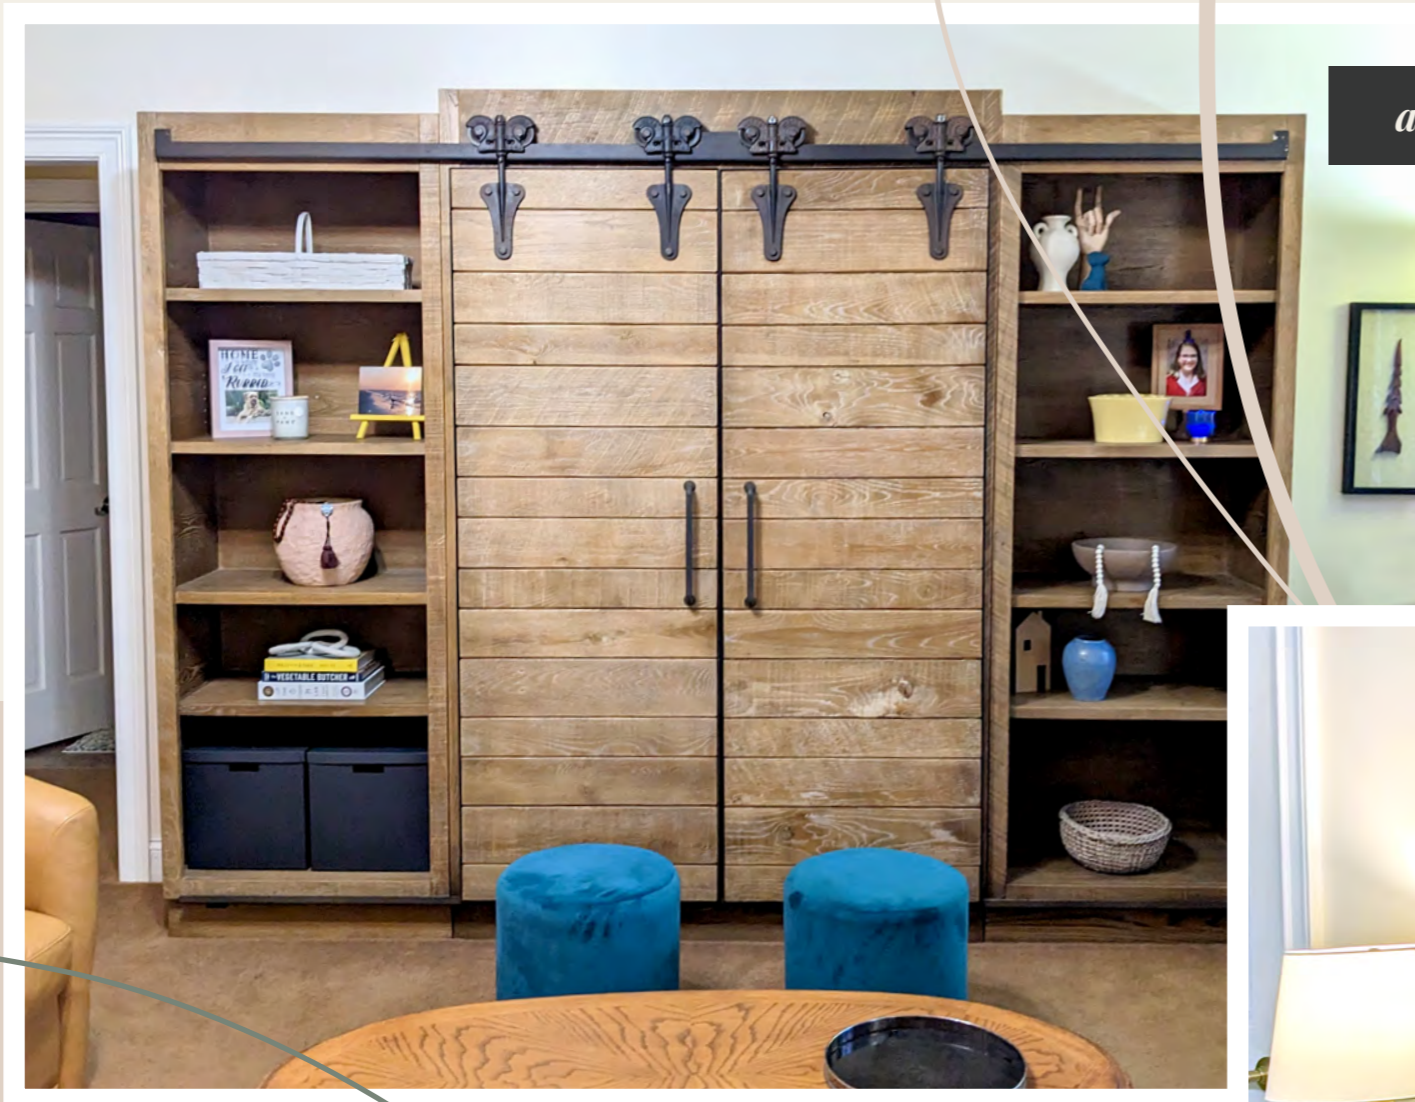

Master Bedroom

I decided to create a neutral color palette as the foundation for the room. I chose cream, beige, and gray, which provide a calm and welcoming backdrop.

From there, I incorporated pops of color and texture through the use of accent pillows, accessories, and personal artwork.

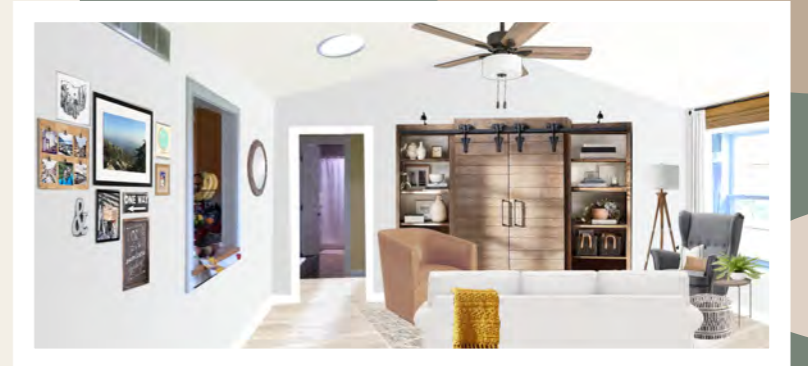

after

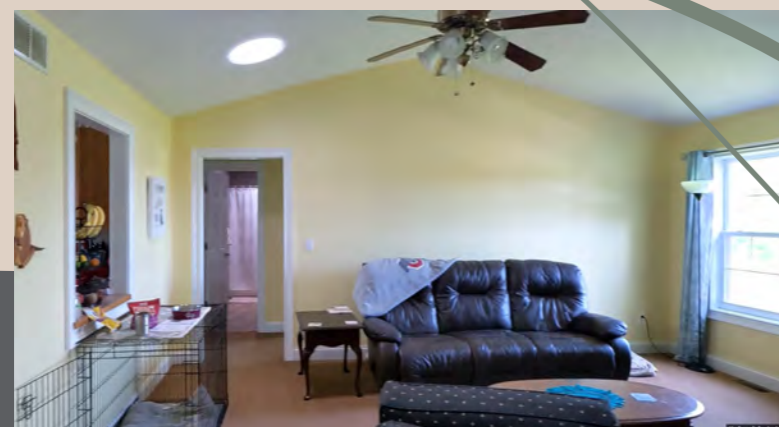

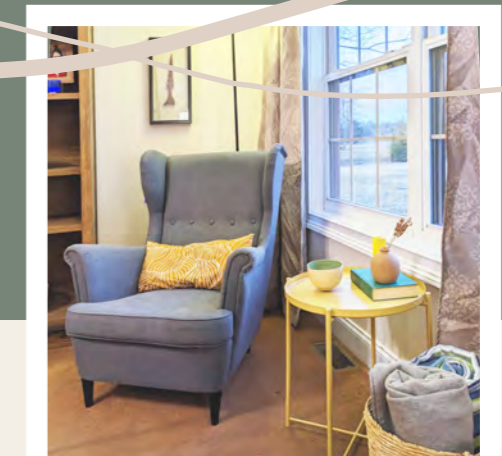

Living Room Project

I recently had the pleasure of designing, sourcing, and installing a living room makeover .

The original living room was outdated and lacked personality. The homeowner wanted a space that was inviting, comfortable, and stylish. After discussing their preferences and lifestyle, I came up with a design plan that transformed the space into a warm and welcoming environment.

“ Working with Jocelyn to redecorate our living room was a wonderful experience. She identified our style, purchased items, and helped with the installation. She maintained excellent communication through the entire process. Our new space is so much more welcoming and functional - we absolutely love it!

”

*Good design can
change your life.*

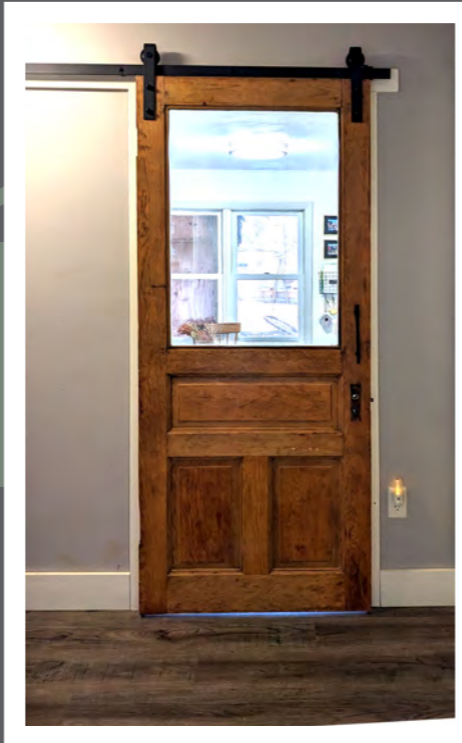

This project included painting every surface, installing a cabinet, dresser, and wardrobe, new floors and light, refinishing an antique door, as well as many other finishing touches.

Laundry Room

My parents were struggling with the chaos and stress of their laundry room. All their cleaning supplies and my dad's clothes closet had to be accommodated within the room as well.

I was able to transform the room from a busy, cluttered, dysfunctional room into an organized, functional, and peaceful space.

The best part of this project was surprising my parents with this room redo while they were out of town!

Our family room is colorful,

friendly and always evolving.

Family Room

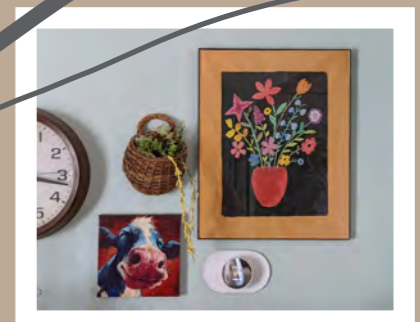

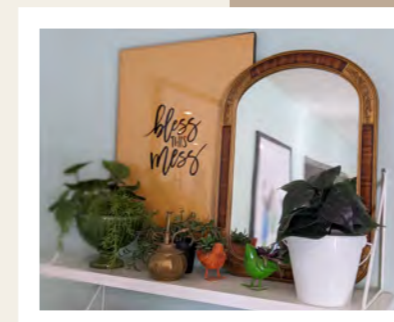

This room was very dark when we bought the house in 2005. A fresh coat of paint on the walls and trim and the new laminate wood flooring made it feel bright and airy.

Another key element of the room was adding the dimable overhead lighting which instantly brightened the room.

I incorporated comfortable seating options throughout the room, including a custom sectional sofa, large custom stained leather ottoman, and a couple of stylish accent chairs. These pieces not only look great but also provide ample seating for our whole family to gather and relax together.

Most of my furniture is secondhand and curated over several years. I have restyled or replaced pieces I find to make a living room that is comfortable and fun.

I collected and created the art, incorporating green and orange accents to contrast with the blue/green walls. I added color and texture to the neutral sofa with pillows and faux blankets. My favorite ways to accessorize the room is with books, mementos from our family trips, and lots of faux plants.

I had so many ideas

for our kitchen renovation.

before

Kitchen Reno

My main priority in this design was to maximize storage. By changing the layout from an L to U, I was able to add more usable and useful cabinet space, including a new pantry, microwave cabinet, and cabinet for trash and recycling. I even incorporated more pantry storage behind the kitchen table in the sideboard. I chose a modern neutral palette to compliment the style of the home.

Guest Room Project

A high style, low budget design for my brother to stay at my sister's house. I increased the amount of storage and greatly improved the feel and functionality of the space all while staying within a \$500 budget.
